RE: New Gymnasium Building – River Park Hospital, Huntington WV

Mr. Jarrett:

I am writing to thank you for the tremendous job you and your team did for our new gym! The entire effort was outstanding and getting completed timely and under budget exceeded our expectations! I can, without hesitation, tell anyone what a pleasure it is to work with the Jarrett Team!

Wes Cremeans was excellent at supervising the work here on site. He was always on the job and never had a problem answering any questions that I or my staff had. He maintained a professional relationship with each subcontractor on the job and maintained a rapport and level of communication with our corporate Regional Project Manager, Ron Pilgreen, wherein the project processes appeared seamless even when we encountered difficulties. I can't say enough good things about Casey Cantrell! He kept us informed each step of the way and was always a pleasure to talk with.

Working on the campus of a 165-bed behavioral health facility, and keeping our patients, staff and visitors safe and out of harm's way during a major construction project was a concern for us. Your team responded above and beyond and made it seem effortless.

Please do not hesitate to use River Park as a reference. I will be more than happy to share our experience regarding Jarrett Construction. I look forward to our next project together.

Best Regards,

Terry Stephens, CEO

Cc: Ron Pilgreen, Regional Project Manager
